

People Need Safe Drinking Water

For just \$5, our kits provide families safe water for a year!

Actually makes water taste better!

Kills all water borne pathogens in minutes

Large enough for a whole family for one year,
small enough to travel with you wherever you go!

The U.S. Environmental Protection Agency (EPA) states that Chlorine Dioxide is the safest, most powerful product to disinfect drinking water.

- Cities around the world use it to treat municipal water systems
- World travelers have used it for over 50 years to ensure clean water
- Meat packing plants disinfect food and equipment with this chemical

A pallet of 3,168 kits costs \$15,840.

A container of 10 pallets costs \$158,400.

(safe water for over 30,000 families)

Note: Chlorine Dioxide has been used for over 100 years and does NOT need FDA or any other government approval for treatment of drinking water!

Purifies 3,000 liters of water
Mix one drop each bottle per liter
